NEW MEMBER

We warmly welcome our new member Politecnico di Milano (Italy)!

REGISTRATION FOR ETN'S AGM & WORKSHOP WEEK IS OPEN

ETN's Virtual Annual General Meeting (AGM) & Workshop Week will take place from 15 to 22 March 2021. Our team has prepared an interesting programme for this year's virtual event – see more details below.

Preliminary programme

- 15 March: Annual General Meeting: *"Strategy for a low-carbon future"*
- 16 March: TC1: Low-carbon GT operation - *"Expanding the solutions portfolio of new energy systems"*
- 17 March: TC2: Operational and fuel flexibility - *"Analysing new technological solutions in respect of market opportunities"*
- 18 March: TC3: Materials degradation, repair technologies & manufacturing – *"Expected material impact and new technology opportunities to overcome challenges in the energy transition"*
- 19 March: TC4: Condition monitoring and asset management - *"Implications of introducing 5% to 30% hydrogen into the grid"*
- 22 March: Closing session: *"ETN strategy implementation and transition roadmap"*

Full programme is available on [our website](#) and will be updated regularly.

Registration

Registration for this event is [now open](#). Please note that there will be no cost to participate in our Virtual AGM & Workshop Week, but it requires that your organisation has paid the ETN membership fee for 2021.

FLEXIBLE POWER GENERATION WEBINAR: sCO₂-FLEX PROJECT

Last chance to register for the next episode of ETN's webinar series on Flexible Power Generation! Join us tomorrow 2 February (12:00-13:00 CET) to hear about the sCO₂-Flex project and the adaptation of fossil fuel power plants to the future energy system requirements. You can still [sign up](#) today! Please note that only registered participants will receive the call link.

Could not join the previous episode? Full recording and all presentations from the latest episode on PUMP-HEAT project are now available on [ETN's website](#).

NEW VIDEO INTRODUCES THE EU FUNDED ROBINSON PROJECT

A [new video](#) that explains and promotes ETN's led Horizon 2020 project ROBINSON (G.A. 957752) has just been published. The video highlights ROBINSON's key features and objectives, such as the development of an integrated energy system to help decarbonise islands. The video also focuses on the specific energy needs of islands and features interviews with the project coordinator and other partners. ROBINSON's integrated energy system will ensure a reliable, cost-efficient, and resilient energy supply, contributing to the decarbonisation of the European islands by helping to decrease CO₂ emissions. Follow the project on [LinkedIn](#), [Twitter](#) and [Youtube](#) to stay updated!

TWO REPORTS PUBLISHED BY THE ZERO EMISSIONS PLATFORM

The Zero Emissions Platform (ZEP) has published two new reports.

[The crucial role of low-carbon hydrogen production to achieve Europe's climate ambition: A technical assessment](#)

The report highlights the need for blue hydrogen and considers production techniques, costs, scalability, and emissions reduction potential. You can download the report [here](#).

[Europe needs robust accounting for Carbon Dioxide Removal](#)

This report provides a definition of carbon dioxide removal. Click [here](#) to access the report.

ETN QUARTERLY NEWSLETTER

ETN's latest Quarterly Newsletter was published in January. If you did not have a chance to read it yet, you can download a copy [here](#).
