International Gas Turbine Conference

Virtual or face-to-face?

Based on the postponement of the conference from 2020 to 2021, the CAB is of the opinion that we should not postpone it further, as we would then risk withdrawal of many of the accepted technical papers.

Feedback and COVID-19 considerations:

- Uncertain when vaccinations programmes have been completed
- Uncertain when companies will support travel to external events and conferences
- Users foreseen a backlog of travel to catch up on postponed tasks once travel is allowed again

Conclusions and suggestion by the CAB and ETN Board

Take a realistic approach and start planning for a virtual event

New virtual platform with networking opportunities being investigated

Upcoming ETN meetings and events

- Young Engineers Committee meeting: [2 April 2021](#) (meetings every 3 weeks)
- Additive Manufacturing Working Group meeting: [7 April 2021](#)
- Flexible Power Generation webinar series - closing episode: [20 April 2021](#)
- Supercritical CO₂ Working Group meeting: [\(date tbc\)](#)
- SGT-A35 User Group – follow-up of 2020 meeting: [May 2021 \(date tbc\)](#)
- Hydrogen Working Group meeting: [May 2021 \(date tbc\)](#)
- LM2500 User Group Meeting: [15-17 June 2021](#)
- High-Level User Meeting: [11 October 2021](#)
- International Gas Turbine Conference: [October 2021](#)
